ORION

GUARANTEES

Many of our products are covered by 1, 2, 3, 5 or 15 year guarantee, if not stated, all others are covered by 12 month replacement guarantee. All claims will require proof of purchase and evidence of issue.

This does not cover accidental damage, improper use or negligence and must be installed by a qualified plumber in domestic setting only.

These guarantees do not cover general wear and tear or poor installations and consequential losses will never be covered.

For full guarantee information please visit our website.

None of the above affects your statutory rights.

We source products from all over the globe, ensuring that we are bringing our customers the best product with affordability, design and quality at forefront of our vision.

We work tirelessly with our partners bringing new and improved products to our range at every opportunity.

Our customers can rest assured that any product entering our range has undergone rigorous life cycle testing and due diligence before being brought to market.

Where applicable our products conform to the relevant UK & European Certification & Standards.

New Eco and Cost Saving Technology for your Bathroom

Our brand new range of taps offer combined cold start and eco flow technology reducing energy and water usage, making these taps extremely efficient and cost reducing. With the fitter in mind these also have our easy fix install nut and are finished in high quality electro plating or PVD coating. TB Plus taps tick all the boxes with stylish ease.

Cold start technology promotes the primary use of cold water for daily tasks which do not require hot water. The tap lever starts in the position to only deliver cold water reducing the carbon emissions and costs associated with heating the water. Unlike our standard mixers where the central start position would have your boiler firing up each time! Of course, if you still want hot water just turn the tap as you normally would to the left.

To complement our Cold Start function our uniquely developed two step cartridge also offers Eco Flow. When you first lift the handle, it will allow 30% of your achievable water flow meaning that you are not using excess water, further lowering your bills and reducing water wastage! If you do require a little more water lifting the handle into step two to offer you full flow.

Where you see this logo our taps have an easy install nut to allow quick installation with no tools required making it ideal for those tight spaces or jobs tight on time!

Our brand new range of taps offer combined cold start and eco flow technology reducing energy and water usage, making them extremely efficient and cost reducing. With the fitter in mind these also have our easy fix install nut and are finished in high quality electro plating or PVD coating. TB Plus taps tick all the boxes with stylish ease.

Cold Start technology preventing unnecessary water heating.

Eco Flow with 30% flow from start to reduce water usage & override to full flow when you need it.

Easy Fix Install taking the hassle out of swapping to TB+

New Eco and Cost Saving Technology for your Bathroom

With cold start technology to prevent unnecessary heating, & our new Eco Flow to reduce water usage, TB+ ticks the boxes with stylish ease.

Cold Start technology preventing unnecessary water heating.

Eco Flow with 30% flow from start to reduce water usage & override to full flow when you need it.

Easy Fix Install taking the hassle out of swapping to TB+.

For more information and to see the full range head to pages 108 - 115

All of our Brushed Brass, Brushed Bronze & Gunmetal taps & showers are finished with a Physical Vapor Deposition (PVD) Coating. This is a high-tech vacuum process provide a thin film to the surface of our products which creates a high performance durable protective barrier against wear & tear as well as giving an enhanced decorative appearance.

Cold start technology promotes the primary use of cold water for daily tasks which do not require hot water. The tap lever starts in the position to only deliver cold water reducing the carbon emissions and costs associated with heating the water. Unlike our standard mixers where the central start position would have your boiler firing up each time! Of course, if you still want hot water just turn the tap as you normally would to the left.

To complement our Cold Start function our uniquely developed two step cartridge also offers Eco Flow. When you first lift the handle, it will allow 30% of your achievable water flow meaning that you are not using excess water, further lowering your bills and reducing water wastage! If you do require a little more water lifting the handle into step two to offer you full flow.

Where you see this logo our taps have an easy install nut to allow quick installation with no tools required making it ideal for those tight spaces or jobs tight on time!

New Eco and Cost Saving Technology for your Bathroom

Our brand new range of taps offer combined cold start and eco flow technology reducing energy and water usage, making them extremely efficient and cost reducing. With the fitter in mind these also have our easy fix install nut and are finished in high quality electro plating or PVD coating. TB Plus taps tick all the boxes with stylish ease.

Cold Start technology preventing unnecessary water heating.

Eco Flow with 30% flow from start to reduce water usage & override to full flow when you need it.

RADIATORS and TOWEL WARMERS

Taupo

Aluminium Radiator*

*Towel rail bar purchased separately.
Size: 1800x375mmmm

Code	Centres	Bars	Finish	BTU	Price
2147	3835	4	Anthracite	3835	£373.00
2148	3835	4	Black	3835	£373.00
2149	3835	4	White	3835	£373.00

Why Aluminium?

Very Energy Efficient

Not only will less gas be used in the process of heating your radiators, our aluminium radiators also use a particularly low amount of water inside them. Less gas, less water and cheaper energy bills as a result. A fantastic reason for switching over to aluminium radiators!

Highly Conductible

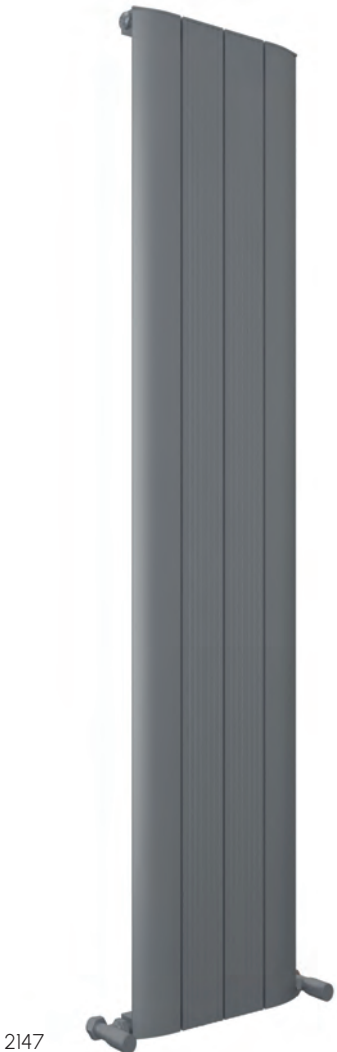

Aluminium is great for heating up quickly, a lot faster than the cast iron or steel alternatives.

Eco Friendly

Can be made from recycled materials & then re-recycled again once it's time to replace. A great eco-friendly option.

Flexible & Durable

With industrial grade properties, they will last longer than alternative materials without degrading & the added flexibilities allow for great designs during manufacturing.
